

Basic Information - Lichtquant

A. What is Bioresonance?

Basic research reveals that there are electromagnetic vibrations in our body which are superior the biochemical processes and control them. In 1984 the Swiss physicist Carlo Rubbia was rewarded the Nobel Price in physics showing that life, both human beings and animals, consists of 99,999 % energy (light) and only at 0,001 % solid material, i.e. solid mass.

Bioresonance is based on the assumption that any organ substance is characterized by a pattern of frequency. This means that for example water has a different vibration than mercury, the vibration of stone is different to that of iron, the vibration of an apple is different to that of birch pollen, the vibration of a virus is different to vibration of a bacterium and so on.

B. What is Galvanotherapy?

Weak direct current, i.e. current continuously flowing in one direction is called galvanic current. Constant ion flow in the same direction results in purging and leads to a cleaning of deep layers, thus harmonizing the body cells.

Due to the impact of loaded proteins toxins and slags connect with the opposite pole and can be discharged more easily. The movement of ions improves the blood flow, stimulates the exchange of oxygen and the production of leucocytes. Furthermore, the pH-value of the tissue is regulated and the defensive power is activated.

C. What is OEG Bioresonance Galvano-therapy?

The OEG Bioresonance Galvano-therapy perfectly unites the advantages of bioresonance with those of Galvano-therapy. Thus, a considerable speed-up of results will be obtained. The organism learns to get along more easily with stress and to absorb the helping substances he misses.

First, the relevant levels will be revealed on the basis of saliva by the OEG-Resonance Test. Then, the OEG-Bio Resonance is produced in two Homaccords, the red one for pathogenic, disease-causing loads, the blue one for regulating, healthy vibrations. These Homaccord ampules are applied for a maximum of ten applications with the OEG-Bioresonance and Galvano therapy instrument.

As *preventive* therapy the red and the blue therapy ampule can also be applied *without* analysis of saliva. In this case, they automatically serve as health transforming vibration (blue) and disease-discharging (red) ampule for regulation and discharge. Analysis of the vibration pattern is of utmost importance for therapist's practice. However, it does *not* replace consultation of a doctor or a therapist.

D. What is tested and given therapy?

The individual frequency pattern is being determined by means of the OEG-Saliva Analysis and is then tested regarding its functions on different levels.

1st Level:

Schuessler-salts and other minerals, vitamins and enzymes, trace elements and essential oils (fatty acids)

2nd Level:

Vegetal substances for the entire fluid balance and cleaning of all body fluids.

3rd Level:

Recipe according to Paracelsus and Hildegard von Bingen, distillates and tinctures with clearing and purifying effects on our emotional ability to act.

4th Level:

Blossom essences according to Dr. Bach, Californian and Australian essences for the clarification of mental developments.

These are the four basic levels, serving the OEG-Vita Activa-therapist as a basis for any further action:

5th Level:

The meaning of the fifth level, the food, focused on healthy nutrition goes without saying. It is reflected by the weight and the mood of the patient as well as his vitality and joy of living.

6th Level:

Food additives, other additives, colours, emulsifiers and many more.

These substances may considerably interfere with healthy organ circuits and provoke allergies.

7th Level:

Interferences in the mouth cavity, the teeth, jaw bone, etc. give the dentist detailed evidence of hidden interferences and find ways to treat them accordingly.

8th Level:

Material for the treatment of teeth and for prevention purposes is individually adapted to the requirements of the dentist. This also includes adhesives and other materials used.

Further levels:

Environmental toxins, heavy metals, pollen, viruses, bacteria, degenerations, genetic material and hormones.

E. Summary:

Application of the OEG-Bioresonance and Galvano-therapy shows the following advantage: Therapy is intensified by 10 times by means of different potency planes (Homaccords) and additional rotation (spin) right side with supporting effects (blue ampule) and left side with detoxifying effects (red ampule).

This means that the amount of nutrients can be reduced because the effect of the therapy is more intensive while the pollutant load diminishes. The organism becomes more permeable and more trained thus resulting in more power and resistance.

New Lichtenberg-Product-Idea - The Homaccord!

A new revolutionary product is about to rank in the chain of successful Lichtenberg-Ideas – the *Homaccord*.

Read here about this innovation:

A famous Greek doctor working with homeopathy, G. Vithoulkas, introduced the following picture: „If you throw a stone into a calm pool, rings occur. Every ring represents a homeopathic potency.“

The Homaccord is consisting of different potency steps. A specific homeopathic substance, the Homaccord, is applied on the carrier of original mother tincture silicon.

This substance includes the information of eight different potency steps from D6 up to D 200 (D6, D8, D10, D12, D15, D30, D60 and D200).

How can this idea be utilized?

The Homaccords are applicable for a quick analysis of any pathogenic area. They can be used for any testing method and at the same time they serve for a healthy regulation in the field of Galvano- and Bioresonance therapy.

For purposes of diagnosis we recommend our OEG-Saliva-Analysis and for therapy purposes we recommend our OEG-Galvano-Bioresonance.

Moreover, you can buy small instruments so that you may lend them to patients for 10 sessions.

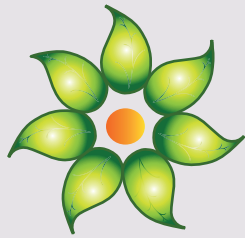

Our first Homaccord-Test, consisting of 16 ampules, is now available at 198 Euro incl. tax instead of 240 Euro. Every ampule contains 30 to 100 kinds of information and acts like a symphonic orchestra under a conductor. The content is taken from the following range:

1. Nutrition-Allergenes
2. Nutrition-Additives
3. Interferences in the mouth cavity
4. Tooth material
5. Pesticides
6. Environmental toxins
7. Geo-Test and electromagnetic pollution
8. Heavy metals and other materials
9. Pollen
10. Degeneration
11. Fungi
12. Bacteria
13. Viruses
14. Genetic material
15. Hormones or 16. Parasites.

New:

Galvano-Therapy, combined with Bio-Resonance and individual saliva analysis

Temporary instruments for home therapy
10 therapies within 10 days with one nosode each for pollutants and remedies which are individually produced for the patient.

This is an easy method. The customer makes use of a saliva test in our practice or contacts OEG-Service. An analysis of remedies, nutrients and pollutants is carried out. An individual nosode is produced according to his requirements. This nosode is applied in the Galvano-Bio-Resonance-Therapy during 10 sessions.

The following revenues can be obtained:

10 therapies of 25 Euro for each therapy; a temporary instrument can be lent by three patients for the duration of one month.

Possible revenues: 750 Euro per month for each instrument.

With this kind of individual analysis optimum therapy results in Galvano-Bio-Resonance-therapy and holistic natural medicine can be obtained.

You have more questions? Please contact us by phone or E-Mail –
We are looking forward to you!

Your OEG-Team

Overview of Basic Products

1. OEG-Basic Test on the patient

Test of the energy quotient. This regulation test shows the energy path and tension of organs as well as control circuits.

2. OEG-Saliva Analysis in your own practice

OEG-nosode test by means of patient saliva. Besides checking for toxic loads you may find out about genic load and the individual dose of nutrients and remedies. The following fields can be tested: nutrition allergens, nutrition additives, interfering fields in the mouth cavity, tooth material, pesticides, environmental toxins, geo test and electromagnetic pollution, heavy metals and other materials, pollen, degenerations, fungi, bacteria, viruses, genetic material, hormones or parasites.

3. OEG-saliva analysis-Service

like item 2, to be carried out by us

4. OEG-Homaccord-Nosode-Service

We produce your individual requirement out of 2000 different nosodes.

Order quantity: starting with one piece

5. OEG-Galvano-Bioresonance-Therapy

In case of an overload of work in your practice we offer instruments for hire for persons who live far from your practice or those who would have no time to come to our office. Thus, the required number of 10 therapies can be carried out within 10 days.

6. OEG-Balance-Products

For the interference elimination in cars, TV and computer, for the energizing of nutrition and water or for harmonization of sleeping-places, geo-zones and electric cables.

Our range of service is widespread. All our products are innovative. They must be adapted to their individual application and must be explained in detail. (Products are individually assembled in modules.). We offer the following possibilities for contact and education:

1. Telephone advice in advance.
2. Introductory presentation at a fixed date arrangement in our office.
3. Introductory education in your practice (including participation of cost)

As a prerequisite for the application of the OEG-products it is necessary to practice an interactive communication and to be prepared for learning and further development.

The prices of our services depend on the relevant scope and must be discussed individually. Saliva tests start from 24 Euro, OEG-Homaccord-Nosodes are produced for 15 Euro per piece. Testing modules are available at the price of 350 Euro. Instruments for applying the OEG-method are available at the price of 1800 Euro.
